

Blowing up balloons.

Materials: Baking soda, vinegar, balloons, bottle, funnel, spoon.

Procedure: 1. Put the baking soda into the balloon using a funnel.
2. Put vinegar into the bottle.
3. Then put the balloons onto bottle.
4. Look at results.

Results: The vinegar and the baking soda reacted. This made a gas which blew up the balloon.

Very good work Keelin.
I love the picture
